- B. 35
- C. 25
- D. 89

Answers

1. **D** – Tens: $3 + 4 = 7$. Ones: $2 + 1 = 3$. The sum is 73. Adding the tens wrongly gives 63 or 83.
2. **A** – Ones: $7 + 6 = 13$, so write 3 and regroup 1 ten. Tens: $2 + 3 + 1 = 6$. Forgetting the new ten gives 53.
3. **A** – Ones: $8 + 9 = 17$, write 7 and regroup 1 ten. Tens: $4 + 1 + 1 = 6$. Forgetting the new ten gives 57.
4. **C** – 28 is 20 and 8, so add 20 and then 8. The other choices use the wrong amounts.
5. **D** – 36 plus 20 is 56. Then 56 plus 7 is 63. Stopping after the first hop gives 56.
6. **B** – Ones: $8 + 4 + 2 = 14$. Tens: $1 + 2 + 1 + 1 = 5$. The sum is 54. Missing the new ten gives 44.
7. **C** – Ones: $9 + 5 = 14$. Tens: $3 + 4 + 1 = 8$. Liam has 84 cards. Forgetting the new ten gives 74.
8. **A** – Ones: $4 + 6 = 10$. Tens: $6 + 3 + 1 = 10$ tens, which is 100. The other sums are 110 and 90.
9. **B** – Ones: $2 + 5 + 8 + 4 = 19$, so write 9 and regroup 1 ten. Tens: $1 + 2 + 1 + 1 + 1 = 6$. The sum is 69.
10. **B** – Subtract 27 from 62 to get 35, and check: $35 + 27 = 62$. Adding 62 and 27 gives 89.

Remember

Remember

- Add ones first, then tens.
- Ten ones can be regrouped as 1 ten: $8 + 7 = 15$ is 1 ten and 5 ones.
- On a number line, hop by tens and then by ones.
- To add three or four numbers, add all the ones, then all the tens.
- Estimating with tens helps you check an answer.
