One quarter, one dime, one nickel, three pennies.

How much money is shown?

- A. 43¢
- B. 38¢

- C. 46¢
- D. 33¢

Question 8

Tom has \$36 and spends \$19 at the fair. How much money is left?

- A. \$27
- B. \$17
- C. \$55
- D. \$15

Question 9

Nine dimes and four pennies.

How many more cents make one dollar?

- A. 4¢
- B. 6¢
- C. 16¢
- D. 94¢

Question 10

Which amount is the same as 150 cents?

- A. \$1.50
- B. \$15.00
- C. \$1.05
- D. \$0.15

Answers

1. **D** - Three dimes are 30¢ and two nickels are 10¢, so the total is 40¢. Counting every coin as 5¢ is a common slip.
2. **C** - A quarter is 25¢ and two dimes are 20¢. Since $25 - 20 = 5$, Kai has 5¢ more. Having more coins does not mean more money.
3. **C** - 4 quarters make 100¢, which is \$1. Five dimes make only 50¢ and ten nickels make 50¢.
4. **D** - The bills make \$8 and the quarter adds 25¢, so the total is \$8.25. Writing 5 for the quarter gives the slip \$8.05.
5. **B** - $100 - 58 = 42$. Count up: $58 + 2 = 60$, then $60 + 40 = 100$, and $2 + 40 = 42$.
6. **A** - The groups are worth 80¢, 50¢, 70¢ and 75¢. Having more coins does not always mean more money.
7. **A** - $25 + 10 = 35$, then $35 + 5 = 40$, then 3 pennies make 43. Counting the nickel as 1¢ gives 39¢ and a slip like 38¢.
8. **B** - $36 - 19 = 17$. Adding instead of subtracting gives \$55.
9. **B** - The coins are worth $90¢ + 4¢ = 94¢$. Then $100 - 94 = 6$.
10. **A** - 150 cents is 100 cents and 50 cents, so it is \$1 and 50¢, written \$1.50.

Remember

Remember

- Penny 1¢, nickel 5¢, dime 10¢, quarter 25¢.
- 100 cents make 1 dollar: 4 quarters, 10 dimes or 20 nickels.
- Count the biggest coins first, then count on.
- Use ¢ for cents and \$ with a dot for dollars and cents.
- To find change, count up from the price to the money paid.

How to use this money quiz

Answer each question, read the explanation that appears, and keep track of your score. A score of 8 out of 10 or more means you are ready for the test.
