Key facts behind this word problems test

Key facts

- Five story types: add to, take from, put together, take apart, and compare.
- A bar model shows the parts and the whole so you can see which number is missing.
- More than and fewer than mean comparing: subtract the smaller number from the larger.
- A two-step problem needs two math sentences; the first answer feeds the second.
- A ? or a letter can stand for the unknown number in an equation.

How to use this word problems test

Time yourself: the test is designed for an average student in 45 minutes. Answer the questions

you are sure of first, then come back to the longer ones and check your units.
