D. $(451 + 339)$

Answers

1. **B** - $264 + 178 = 442$. The ones make 12 and the tens make 13, so you regroup twice. Forgetting to carry gives 332.
2. **D** - $623 - 185 = 438$. You must regroup in the ones and in the tens. Subtracting the smaller digit from the larger in each column gives 562.
3. **B** - $285 + 300 = 585$, $585 + 40 = 625$, $625 + 7 = 632$.
4. **C** - 527 rounds to 500 and 391 rounds to 400. Then $500 + 400 = 900$.
5. **A** - $358 + 467 = 825$. The ones make 15 and the tens make 12 with the regrouped ten. Not regrouping gives 715.
6. **B** - $710 - 385 = 325$. Adding 385 and 710 would give 1,095, but the total is already 710.
7. **A** - Regroup 1 hundred as 10 tens, then 1 ten as 10 ones: $500 - 238 = 262$. Subtracting the smaller digit in each column gives 338.
8. **A** - To check a subtraction, add the difference to the number subtracted: $317 + 297 = 614$.
9. **D** - $6 + 8 = 14$, $5 + 7 + 1 = 13$, $4 + 2 + 1 = 7$, so the sum is 734. Forgetting both carries gives 624.
10. **C** - $502 + 289 = 791$, which is greater than 785, 784, and 790.

Remember

Remember

- Within 1,000 means every number and every answer is 1,000 or less.
- 10 ones make 1 ten and 10 tens make 1 hundred; trading them is called regrouping.
- In addition, regroup when a column sum is 10 or more.
- In subtraction, regroup when the top digit is smaller than the bottom digit.
- Check a subtraction by adding the difference to the number subtracted.
